

GELBVIEW PROGRAMS FEEDER FAX LINE

The Canadian Gelbvieh Association's Commercial Industry Development Committee (CIDC) developed the Feeder Fax Line Program to assist Commercial Cattle Producers to market their Gelbvieh influenced feeder cattle. The Feeder Fax Line Program can be utilized directly off the farm or through the auction market system.

Who can use the system?

Commercial cattle producers who have purchased one or more registered Gelbvieh bull(s) and the registration certificate(s) transferred into their name.

How does it work?

The commercial producer completes the Feeder Cattle Data Sheet (available from the Canadian Gelbvieh Association office) and either faxes or mails this form to the Canadian Gelbvieh Association office. The Canadian Gelbvieh Association office ensures that the data sheet has been completed properly and then broadcasts the sheet to order buyers and feedlots across Canada. Buyers interested in purchasing a particular listing will then contact the Seller directly to negotiate pricing, delivery, etc. or attend the auction market on sale day to bid on the group of cattle they are interested in. The Canadian Gelbvieh Association will not be involved, in any way, in the price negotiations.

What does it cost?

This listing service is provided at no charge to commercial cattle producers with registered Gelbvieh bulls, or to the feeder cattle buyers who wish to receive these fax listings.

Note: Feeder cattle buyers wishing to be included on the Gelbvieh Feeder Fax Line should contact the Canadian Gelbvieh Association office with their fax numbers as soon as possible.

For further information, please contact Wendy Belcher at the Canadian Gelbvieh Association.
